WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Shell: 5 mm plate rolled to 760 OD, 90 deg of arc (597 long on the outside), 450 long
Flanges 50 x 10 along both long edges, inside, flush with the edge faces
Cutting band 60 x 10 inside the front edge, front ground to a 30 deg bevel
M20 weld nut inside, 20 deg round from the crown joint, 25 from the rear edge
22 hole through the shell under the nut for the jacking screw
Make one for each side: the nut is on the upper part of each segment
Check: matches the 760 template within 2 mm; flange faces flat
