WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Shell: 5 mm plate rolled to 760 OD, 120 deg of arc (796 long on the outside), 700 long

The rear 450 is the ring; the front 250 is the hood that reaches past the other segments

Flanges 50 x 10 run the full 700 and stiffen the hood edges

Hood lip 60 x 10 rolled inside the front edge

Two M20 weld nuts 15 deg either side of the top, 25 from the rear edge, with 22 holes through

Two saddles from 25 plate at 40 deg from the top, cut to the 194 spigot, 60 long

Check: rest the hood on the floor; the lip touches all along
