WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Two alike: a hoop 260 outside diameter round the rear 120 deg of the winch
Sheet 2 mm perforated, 175 high, rolled; top edge 790 above the ground
Two legs 30 x 5 flat, 65 long, welded inside the hoop 10 deg in from each end
Each leg turned out at the foot and bolted M8 into the trestle top plate
Open toward the pipe (+X) so the rope reaches the drum
Check: 10 clear of the drum and rope; nothing to catch a sleeve

SLEEVEDRIFT
